

Dow Building Solutions

INSTA STIK™ Quik Set ADVANTAGES

- Maintains adhesion during freeze/thaw cycles
- Maintains characteristics even after freeze/thaw
- Prevents shifting of insulation boards in high wind conditions in loose-laid and ballasted applications
- Maximizes wind uplift resistance
- No thermal conductivity
- No obnoxious odor, noise pollution
- No building height restrictions
- No puncturing of vapor retarders
- No asphalt penetration into building interior (steel deck)
- Clean, controlled application
- Longest shelf life in the industry (15 months)

Stick With a Proven Performer

INSTA STIK™ Quik Set Commercial Roofing Adhesive is a one-component, moisture-cured polyurethane adhesive for attaching compatible roof insulation boards to roof decks and substrates.

Because it is a single-component foam, INSTA STIK Quik Set is always on ratio, reducing adhesion failure. It works well in a wide range of temperatures (33°F/0.55°C to 110°F/43°C), extending the practical working season and hours. And INSTA STIK Quik Set is easy to apply, requiring no special application equipment or power sources.

Equipped for Jobs of All Sizes

INSTA STIK Quik Set in the 30 lb tank is available with and without dispensing equipment.

INSTA STIK™ Quik Set Complete is supplied in a 30 lb unit, 23 lb net chemical weight, with a flexible dispensing hose and wand assembly. An on/off ball valve at the end of the dispensing hose allows operational control for single-hand application. The supplied flare-tipped nozzle is ideal on fluted metal decks or in high wind conditions.

INSTA STIK™ Quik Set Tank

Only is supplied in a 30 lb unit, 23 lb net chemical weight, with no dispensing equipment.

The Multi-Bead Applicator enables fast and efficient adhesive application.

Specifically designed for use on large, open roof areas with few penetrations, the Multi-Bead Applicator from Dow offers contractors a rapid, labor-saving method of applying beads of INSTA STIK™ Quik Set Adhesive to roof decking in a correct and repeatable pattern.

Featuring an improved design, the Multi-Bead

Applicator holds three tanks of INSTA STIK Quik Set and allows fast and efficient application of up to eight beads of adhesive.

Convenience and Versatility on Deck

Versatile INSTA STIK™ Quik Set Commercial Roofing Adhesive can be used on wood, concrete or metal decks, insulation boards and other substrates for an efficient, economical solution to many roofing applications.

Wood

INSTA STIK Quik Set holds insulation securely without damaging the structural integrity of the wood deck. And no unsightly fastener points poke through the exposed underside of the deck.

Concrete

Without the noisy and tedious pre-drilling step required by mechanical fasteners, INSTA STIK Quik Set helps speed up the installation process. INSTA STIK Quik Set is compatible with expanded polystyrene (EPS), wood fiber board and other materials used on concrete decks.

Metal

Eliminate concerns associated with mechanical fastener penetrations (drilling through electrical conduit or the exposed underside of the deck, thermal bridging and environmental conditions).
